

Stainless steel wire for fastener manufacturers

Stable input for fastener production:
consistent quality and continuity of supply

Your stainless steel wire partner for fastener production

Metalwire is a stainless steel wire supplier based in Horst, the Netherlands. We support fastener manufacturers with wire supply that fits their production reality: clear specifications, consistent batches and supply routes you can plan around. Our focus is simple. Stable input material helps keep fastener output stable. And continuity of supply helps prevent last-minute re-sourcing and production stops.

We work with fastener manufacturers across Western Europe and the UK. Requirements differ per fastener type, machine set-up and tolerance needs. That is why we align grade, diameter and presentation to the application — and keep it consistent over time.

Metalwire. Your challenge. Our wire solutions.

Typical fastener applications

We supply stainless steel wire to fastener manufacturers who process it into the following applications, for example:

- ✓ Screws & bolts
- ✓ Hooks & formed parts
- ✓ Nuts & threaded parts
- ✓ Pins, rivets & custom fasteners

30+ years
of experience

Stainless steel wire for fastener manufacturers

Stable input for fastener production:
consistent quality and continuity of supply

Consistent quality

Wire quality is checked per batch to keep your output stable.

- ✓ Diameter
- ✓ Tensile strength
- ✓ Tolerances
- ✓ Certificates on request

Grades & Diameters

Stainless steel wire aligned to your application and processing needs.

- ✓ AISI 304 (L, CU), 316 (L)
- ✓ AISI 430, Duplex etc.
- ✓ Diameters ~ 0.50 - 10.00 mm
- ✓ Several packing options

Continuity of supply

Clear supply routes including stock holding programme so you can plan production realistically.

- ✓ From stock
- ✓ Made-to-order
- ✓ Stock holding programme
- ✓ Call-off terms agreed
